service, and pay premium rates for this.

Limited options for home office - only Bell mobile or Xplornet satellite; very expensive and very slow download upload speeds (3 mbps down; 1 mbps up). Can't do video calls. Been incredibly challenging during work from home/home school covid. Waiting for Starlink. Government is giving subsidies to telecom companies that are slow to remedy the situation; Starlink is moving fast to improve rural internet however government has seeming overlooked them.

In bad weather when more folk on it often goes slow or drops.

Lack of reliability and speed. Challenging to operate a business with these issues when most transactions are now debit or credit based which rely on a stable internet connection.

I have been very fortunate to have had good service for years BELL Sympatico

It is common for their to be drastic reductions in speed as well just losing service for brief periods of time. I reach out to the providers. The resolution typically is to reboot everything due to the drop in service.

Would you like us to contact you for more information or for a follow-up? Please leave your business Name, phone number and/or email address below. Thank you!
